

MOBILE LED 165**SCREENLIFTER****ScreenLifter MOBILE LED 165 • 1.5 • Roll in - Unload - Start the Show in less than 3 Minutes!**

Handling large LED walls has never been this easy! Gone are the days of tedious and wear-increasing on-site assembly and disassembly.

Once assembled, the LED wall can stay attached to the MOBLILE LED 165 in storage, for transportation and during the show.

Equipped with our newest generation of lifting columns, the ScreenLifter can handle a load of up to 600 kg and is optimized for the installation of 6x6 27-inch LED cabinets or All-in-One systems up to 165-inch diagonal.

The ScreenLifter MOBILE LED 165 is equipped with a tilt and shift feature that allows it – with LED wall attached – to pass through doorways 2 meters in height.

It also comes with several fine adjustment mechanisms to help with aligning multiple units for panoramic installations. An optional swivel feature allows changing the LED wall's orientation from landscape to portrait.

Optional accessories include bolt-on extensions for the base plate to enlarge the ScreenLifter's footprint, and a special set of brackets that turn the ScreenLifter into an efficient lifting aid for flying the LED wall.

The ScreenLifter MOBLILE LED 165 has integrated shock absorbers that keep the LED wall safe during transportation and handling. It ships in a compact flight case or with an optional wheeled dolly if only "inhouse mobility" is needed.

FEATURES & FUNCTIONS

- Electrical transport and positioning system
- Stepless height adjustable up to 270 cm (Landscape - Center line)
- Tool-free assembly within 3 minutes
- Flight case with electrical unload function
- Pack size: 376 (L) x 230 (H) x 100 cm (W)
- Transport: Truck 7,5t
- Doorway: 199 cm (H) x 116 cm (W)
