

**PROJECTION****HOLOSCREEN  
INTERACTIVE**

With the MediaScreen HSI 100" ultra-short-throw it is now possible for the first time to combine high-performance short-throw projectors with HoloScreen rear projection screens.

The 100" HoloScreen projection screen is designed specifically for 57° projection angle and allows individual HoloScreen rear projection solutions with an enormous image width of 215 cm by a minimum depth of only 83 cm (1-chip DLP).

The transparent 100" HoloScreen enables totally new presentation solutions for trade shows, events, museums, showrooms, television productions as well as for POS and POI installations.

The HoloScreen has popular 16:10 aspect ratio and offers almost total transparency. The high light output ensures thereby high contrast presentation of multimedia content of any kind. Furthermore, the 100" HoloScreen is also perfectly suitable for stereoscopic applications with 3D content "floats" in midair and creates a very futuristic look.

The HoloScreen can be used as a passive presentation system or in conjunction with various tracking technologies as an interactive presentation solution. In addition, various integration options for levitating ceiling installation or fixed installation in existing furniture's are available.

The 100" HoloScreen is available by MediaScreen as a rental or purchase solution.

**FEATURES & FUNCTIONS**

- Transparent 100" HoloScreen
- Brilliant and high-contrast display
- Homogeneous and grid-free display
- With aluminium stand and projector bracket

**TECHNICAL DATA**

- Screen Size 100" (254 cm)
- Screen Dimensions 225 (W) x 144 cm (H)
- Aspect ratio 16:10
- Viewing angle 70° H/ 24°V
- Optional Interactive 3D capability  
Touch Control  
Gesture control
