

PROJECTION

MEDIASPHERE MULTI TOUCH WITH CURVED 65" LCD BACKDROP

This stunning spherical projection system is ideally suited for the presentation of "global" content such as branch locations of globally operating businesses, shipping routes, geographic-, meteorological- and political data, or just about any other spherical content.

The integrated, high-performance projector provides a high-contrast display even in bright surroundings and the high-precision multi-touch control allows the joint exploration of the content simultaneously by multiple users. You can combine the Media Sphere Multitouch also with different backdrops for additional information e.g. curved displays, HoloScreens or LED video walls.

FEATURES & FUNCTIONS

MediaSphere MultiTouch
